Price: \$1250.00

Which includes: GPS Tracking unit, SIM card, SIM card Data credit, Online Tracking Software, Delivery & GST.

Overview

The 2-in-1 GPS TRACKER and LISTENING BUG can be used to track pets, persons or assets. Its location can be tracked in REAL-TIME with live tracking via the internet through our GPS Web panel. This miniature unit allows you to locate its EXACT position at any time, accurate to within a couple of metres, and to listen in to its surroundings. Perfect for inside a car, track your spouse's location and listen to conversations taking place inside their vehicle. Other GPS trackers can only tell you where the unit has been PREVIOUSLY... Our unit tells you its location RIGHT NOW, at any time! It will also record its previous locations so you can go back and look at the history or patterns of movements. The unit has a waterproof and magnetic casing to allow easy attaching to the underside of any vehicle.

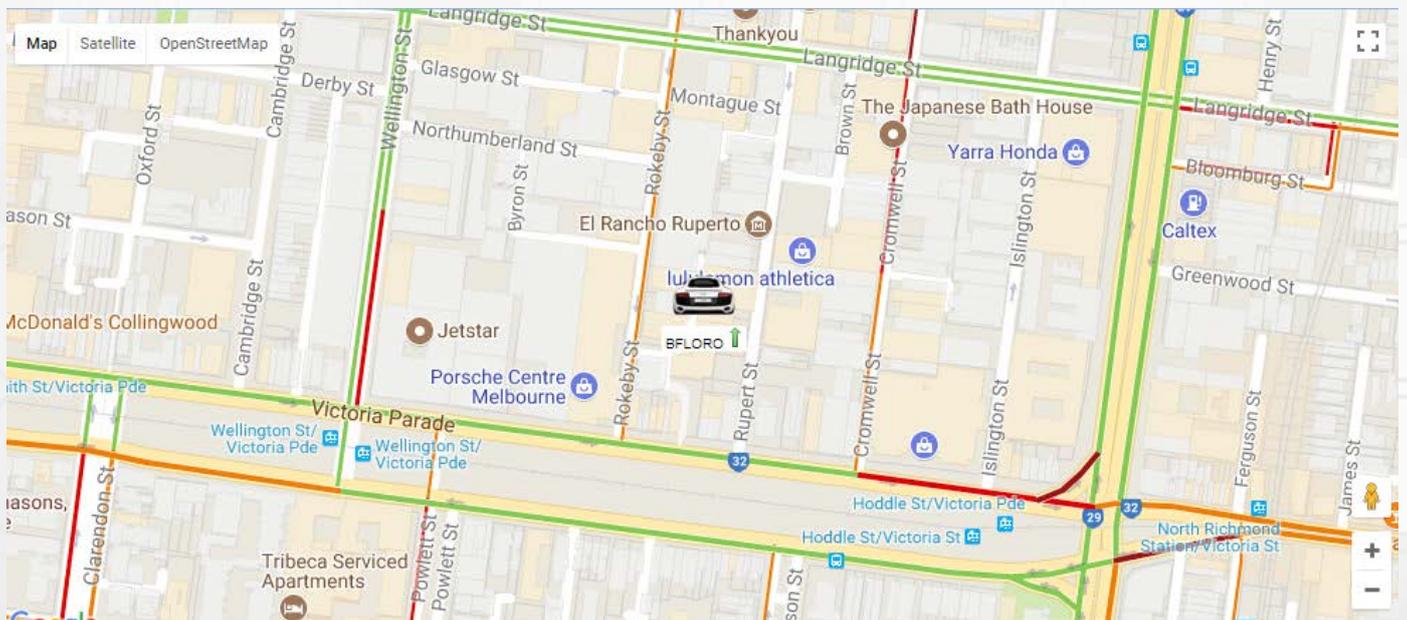

How it works

The unit will be set up and turned on before it even reaches you. Track it as it makes its journey to you via Australia Post. Once it arrives, simply take it out of the box and place it in or under the vehicle you want to monitor and start monitoring. Track its location from your phone, tablet or computer anywhere, any time. Place a phone call to the SIM card inside the unit in order to listen in live to its surroundings. The unit is specially designed for long battery operation time (One entire month on a single charge) after which time you simply recharge the unit and place it back in or under the vehicle. The high GPS and GSM sensitivities allow the unit to function underneath a vehicle without any external antennae.

Applications

- ✓ Vehicle tracking
- ✓ Personal tracking
- ✓ Asset / container tracking
- ✓ Pet tracking
- ✓ Covert tracking
- ✓ Spouse/Partner Tracking

Use of Google Earth mapping

Extra features

The GPS Tracker has some unique features such as “Sound Monitoring” and “SOS Notification.” The Sound Monitoring feature enables the user to place a silent call to the Tracker allowing the user to listen to the ambient sounds around the device through the on-board microphone.

The SOS Feature is primarily used when the user has openly given the Tracker to a person that they wish to monitor and when that person has an emergency or requires immediate assistance, this feature can be activated by pressing and holding the “SOS” button on the Tracker. The device will then send the user an SMS containing the GPS location and place a call to the user, opening the microphone so the user can listen in to the ambient sounds around the device.

GPS Receiver

Chipset	UBLOX
Waterproof	IP-67
Sensitivity	-159db
Reacquisition	<0.1s
Hot	1s typical
Warm	35sec typical
Cold	35-80sec typical

GSM Transceiver

Frequency	GSM 900/1800/1900 MHz or GSM 850/1800/1900 MHz
------------------	--

General

Antenna	Internal GSM antenna and active GPS patch antenna
External Power Supply	5.0 ~ 8.0V DC with charging current of 500mA
Battery Power Supply	3.7V DC
Battery Capacity	20000mA Li-ion battery
Battery Operation	>One (1) entire month on a single charge (20000mA battery)
Dimension	120 x 60 x 21mm
Weight	200g
Environment	Operation Temperature -20°C ~ 55°C
	Storage Temperature -40°C ~ 85°C
